

Resistance Management

Rick Keigwin

Director, Biological and Economic Analysis Division

October 8, 2008

Pesticide Program Dialogue Committee Meeting

Scope of Today's Discussion

- **Inform PPDC about new initiative on resistance management**

- **Begin dialogue with stakeholders**

Pesticide Resistance

- **Resistance is the significant and heritable decreased sensitivity of a pest to a pesticide.**

What is Resistance Management?

- **Resistance management is both reactive strategies to mitigate existing pesticide resistance and proactive initiatives to prevent future pesticide resistance development.**

Achievements To-Date

- **Voluntary labeling guidelines developed with Canada's PMRA**
- **PR Notice 2001-5 issued**
- **OPP Resistance Management Workgroup formed**

What is OPP focusing on?

- **Addressing resistance management issues in decision-making processes**
- **Working collaboratively with stakeholders to address resistance management issues in an effective way**
- **Promoting stewardship efforts**

Next Steps & Path Forward

- **Examine international approaches for resistance management initiatives**
- **Identify key resistance management issues**
- **Conduct additional outreach**
- **Develop strategic plan for addressing pesticide resistance issues**

Questions?

Thank you!
