Below is Figure 4 from the article "Expression in Tobacco of a Functional Monoclonal Antibody Specific to Stylet Secretions of the Root-Knot Nematode," by T. J. Baum, A. Hiatt, W. A. Parrott, L. H. Pratt, and R. S. Hussey. As originally published the figure was in the wrong orientation.

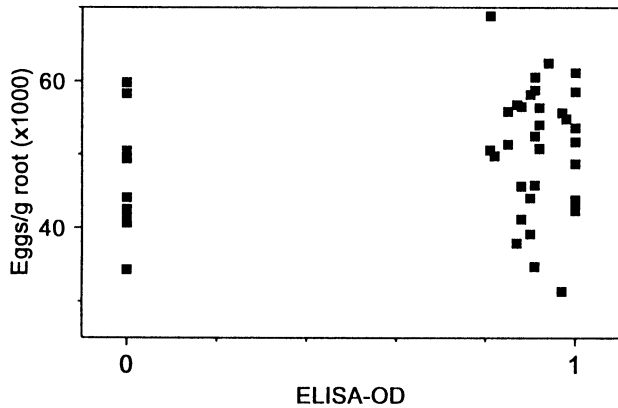

Fig. 4. Reproduction data of *Meloidogyne incognita* (eggs per gram of root) on tobacco expressing assembled 6D₄ heavy and light chain protein (ELISA-OD around 1) and tobacco expressing either heavy or light chain protein of 6D₄ (ELISA-OD of 0) measured in leaf tissue.
