## EDITORIAL BOARD

### Editor-in-Chief:

L. SEQUEIRA, Department of Plant Pathology, University of Wisconsin, Madison, WI 53706

### Senior Editors:

R. BAKER, Colorado State University, Fort Collins, 80521  
A. H. ELLINGBOE, Michigan State University, East Lansing, 48823  
K. J. LEONARD, North Carolina State University, Raleigh, 27607  
R. HAMILTON, Agriculture Canada, Vancouver

## GENERAL PUBLICATION POLICIES

Manuscripts may be submitted for consideration of publication in PHYTOPATHOLOGY by members of The American Phytopathological Society and by nonmembers. Membership in the society is not a prerequisite for publication in the journal, but page charges are higher for nonmembers than for members.

**Submission of manuscripts:** Submit all new manuscripts to The American Phytopathological Society, Editorial Office, 3340 Pilot Knob Road, St. Paul, MN 55121. Do not submit new manuscripts to the Editor-in-Chief. Submission implies nonsubmission elsewhere and (if accepted) no publication elsewhere in the same form without consent.

**Content:** Contributions should fall into the following categories: 1) Original research on some aspect of plant pathology or brief accounts of techniques or phytopathological history of general importance. Subject matter is not a criterion for judging the merit of an article for publication in PHYTOPATHOLOGY. It is, however, the author's duty to establish relevancy to the science of plant pathology. 2) Review papers developing a new concept, hypothesis, theory, or other integration of plant pathology. 3) Letters to the Editor: These may explain, amplify, or otherwise comment upon research published in the journal or elsewhere. Letters to the editor are reviewed in the same manner as other contributions, and the Editorial Board reserves the right to reject or to publish letters of rebuttal when appropriate. If possible, the opportunity will be provided for a letter of rebuttal to appear in the same issue as the letter to which it is directed.

**Page charges:** The high costs of publishing require that we solicit from research sponsors voluntary contributions in the amount of \$45 per printed page for members and \$55 per page for nonmembers. Payment of the suggested contribution is not a condition of publication. Articles are accepted or rejected only on the basis of scientific merit. We ask that you advise your institution, company, or research sponsor of our need for contributions to support publication costs. Please send a letter confirming that you will make the contribution or ask your administrative officer to send a letter stating that funds are not available.

**Separates:** No free copies supplied. Reprints will be available at a nominal cost; quotation will be sent with proof.

**For style details, follow:** Author's Guide for Manuscript Preparation, PHYTOPATHOLOGY 69:5-7, 1979, and CBE Style Manual (fourth edition, 1978), available from Am. Inst. Biol. Sci., Washington, DC. Authors are urged to have one or more colleagues read the manuscript *critically* prior to submission.

**Use of material from this journal:** PHYTOPATHOLOGY is copyrighted, and those who wish to borrow illustrations or data appearing in PHYTOPATHOLOGY for use in other publications should obtain the permission from The American Phytopathological Society and the author of the paper and provide a line crediting PHYTOPATHOLOGY as the source of the material.

PHYTOPATHOLOGY for June (70:471-580) was issued 16 June 1980.
