

Erratum
Vol. 79, No. 3, 1989

An article by W. E. MacHardy and D. M. Gadoury (Phytopathology 79:304-310) entitled "A revision of Mills's criteria for predicting apple scab infection periods" contains incorrect fourth-order regression coefficients in two equations in Table 1. The incorrect coefficients are the x^4 terms of equations labeled "Lab/c" and "Orchard/a". The complete equations, with the correct x^4 terms, are as follows:

$$\begin{array}{ll} \text{Lab/c} & y = 76.5384 - 17.6803x + 1.7201x^2 - 0.0731x^3 + 0.001136x^4 \\ \text{Orchard/a} & y = 122.3869 - 28.7786x + 2.6028x^2 - 0.1019x^3 + 0.001461x^4 \end{array}$$
