

Acknowledgment of Reviewers, 1993

The success of PHYTOPATHOLOGY depends on the quality of manuscripts submitted by authors and on the care and competence with which they are reviewed. It is the policy of the Editorial Board to solicit reviews of manuscripts from specialists most qualified to review them. In addition to members of the Editorial Board, the individuals listed below provided constructive critical reviews of one or more manuscripts during the past year. Their names are published here in grateful appreciation for their contribution to the journal and to the science of phytopathology.
